

The CC Euro Rollcontainer is a low-noise load carrier...

...perfect for quiet, night-time deliveries.

CC Euro Rollcontainer

The two-sided roll cage for low-noise deliveries

Noise-reduced deliveries

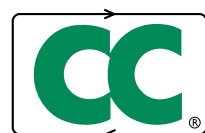

The CC Euro Rollcontainer has been designed specifically with noise and weight reduction in mind. It adheres to European legal requirements, incl. the Dutch PIEK requirements, for low-noise equipment that facilitates quiet, night-time deliveries without disturbing local residents. The result is a two-sided transport item that is ideal for the efficient picking, packing and distribution of consumer products from distribution centres to retailers.

Night-time distribution benefits

Being able to distribute goods at night-time can help reduce daytime road congestion and therefore it can help improve journey times and fuel economy for transporters, improve stock turn-around, and reduce CO2 and NOx emissions in local areas.

Easy handling and storage

The CC Euro Rollcontainer has a lift-up hinged base and swing-back sides that allow for easy nesting in order to economise return logistics and storage. When fully loaded, the CC Euro Rollcontainer can be secured with adjustable straps to make sure that the goods stay safely inside. The straps can be easily released. The CC Euro Rollcontainer can be handled manually or with automatic lifting equipment such as a pallet or forklift truck.

Making your products move

CC Euro Rollcontainer

The two-sided roll cage for low-noise deliveries

Specifications: CC Euro Rollcontainer

Length	811 mm
Width (external / internal)	640 / 620 mm
Height (external)	1900 mm
Handling height / width	173 / 565 mm (on long side)
Weight	33 kg
Materials	Deck: recycled black plastic with a steel frame Sides: steel Wheels: elastic-vulcanised rubber
Dynamic load capacity	400 kg UDL*
RFID** label	UHF Class 1 Gen 2
Temperature range	-30°C to +50°C
Certifications	NL PIEK certification pending

*UDL: Uniformly Distributed Load
**RFID: Radio Frequency Identification

What you get with the CC Euro Rollcontainer:

- 1 Developed for efficient picking, packing and distribution of consumer products** from distribution centres to retailers.
- 2 Low noise wheels** – maximum 60 dB. The CC Euro Rollcontainer fulfils PIEK requirements for noise-reduced night-time deliveries, and complies with local as well as EU legislation on maximum noise levels.
- 3 Easy to handle.** The low-weight plastic deck and swivel wheels make the CC Euro Rollcontainer ergonomically friendly.
- 4 High-quality, long-lasting load carrier.** The steel reinforcements under the deck create a strong and stable product with low repair and maintenance costs. It can carry an evenly distributed load of 400 kg.
- 5 European standard dimensions.** With an internal footprint corresponding to a ½ Euro Pallet, the CC Euro Rollcontainer fits with standard European modular packaging.
- 6 RFID traceability and barcodes:** The deck has two passive RFID labels with barcodes to facilitate registration and Track & Trace in product flows from producer to retailer.
- 7 Nestable.** Push the base into a vertical position to nest the CC Euro Rollcontainer. This reduces storage volume significantly for the return transport.
- 8 Environmentally friendly.** All parts can be recycled.
