

Can be rolled all the way from the producer ...

... and directly into the store, to be used as display.

CC Minitainer

The sturdy roll cage

A high-quality roll cage for heavier bulk items

CC Minitainer is a robust roll cage, developed especially for transporting heavier bulk items, e.g. sacks of root vegetables. Its internal dimensions are the same as $\frac{1}{4}$ Euro Pallet, so it matches European standards. It can easily be handled manually or mechanically, and for storage and return logistics it can be nested and condenses to a fraction of its loaded volume. To ensure protection from corrosion, it's made from hot dip galvanised steel and functions at temperatures ranging from -30°C to $+70^{\circ}\text{C}$.

The perfect in-store display unit

Since the CC Minitainer is designed as an in-store display unit, it can carry your products all the way from production plant and directly into the store. They only need to be loaded once to save you the usual costs and risks of reloading. And with everything moving on wheels, in-store handling is much easier. One person alone can roll this cage from the backroom and into the shop. The neutral design makes it a great in-store display unit, as your products will be the eye-catchers – not the cages.

Specifications

Size	External	Internal
Length	648 mm	605 mm
Width	472 mm	415 mm
Height	1250 mm	1068 mm
Weight	36.5 kg	
Carrying capacity	250 kg UDL*	

* UDL: Uniformly Distributed Load

Making your products move

CC Minitainer

The sturdy roll cage

What you get with the CC Minitainer:

- 1 Developed to transport heavier bulk items**, e.g. sacks of root vegetables.
- 2 Fits European standardised systems.** Internal dimensions corresponding to $\frac{1}{4}$ Euro Pallet.
- 3 Ideal as a retail display unit.** Discreet construction makes your products the eye-catchers – not the CC Minitainer.
- 4 Ensures a cost-efficient return flow.** A safe lift-up hinged base and swing-back sides ensure that for return logistics and storage it condenses to a fraction of its loaded volume.
- 5 Minimised in-store handling.** One person alone can roll it from the backroom and into the store, even without lifting equipment.
- 6 A durable construction ensures perfect product safety.** It's made from hot dip galvanised steel to ensure protection from corrosion.
- 7 Can endure dramatic changes in temperatures.** It can be used or stored from -30° to $+70^{\circ}$.
