

Perfect display of your goods ...

... and when the crates are empty, they don't take up unnecessary space.

CC Eurocrate

The collapsible crate

A robust plastic crate to ensure top level product protection

CC Eurocrate is a strong plastic crate for food and non-food items, offering great product protection. For return logistics it condenses to a minimum of its loaded volume, as all sides are collapsible. A lift-lock closure mechanism ensures that the crate – filled or empty – won't collapse during handling. It offers perfect hygiene levels with its smooth surface, a minimum of ribs, and holes that are positioned to facilitate the draining of water.

A neutral design makes your products stand out

The neutral colour of anthracite grey is chosen specifically to ensure that your products will be the eye-catchers – not the crate. The discreet construction of the CC Eurocrate makes it a great in-store display. Also to make it easier for you to keep track of your products, the crate comes with EAN bar code labels on both long sides – as well as RFID tags integrated underneath. The short side has label holders and space for stickers.

Making your products move

CC Eurocrate

The collapsible crate

What you get with the CC Eurocrate:

- 1 A collapsible plastic crate** developed for the transportation of both food and non-food products.
- 2 EAN bar code labels and RFID tags** make it easy for you to track your products.
- 3 Easy to clean and dry** with a smooth surface, a minimum of ribs.
- 4 Ensures a cost-efficient return flow.** All four sides can be collapsed, so for return logistics it condenses to a fraction of its loaded volume.
- 5 Recyclable.** Made from Polypropylene (PP), which is fully recyclable.
- 6 The perfect in-store crate.** The neutral colour of anthracite grey.
- 7 A lift-lock** closure mechanism ensures that it doesn't collapse during handling.
- 8 Protects your employees** with ergonomically correct mechanism.
- 9 Very suitable for both mechanical and manual handling,** filled or empty, from all four sides.
- 10 The short side of the crate has a pocket for label holders** and a place for stickers.
- 11 Can endure dramatic changes in temperatures.** It can be used or stored from -30° to $+70^{\circ}$.
- 12 Can be stacked with most plastic crates** in the market. It meets European standard dimensions.
- 13 Stacking strength up to 400 kg** load on the corners.
- 14 Can be carried on e.g. CC Rolly, CC Dolly, CC Euro Dolly, CC Eurocontainer, CC Rollcontainer,** or standard Euro Pallets.
