

With CC LogLink you can keep track of all your RTI transactions.

With regular updates, disputes can be settled right away, so you can focus on your core business.

CC LogLink Service

We show your RTIs' every move

An efficient logistic system to monitor your RTI transactions*

CC LogLink is the logistic tool that holds the total overview over your product flow. With this intelligent system, you can follow your RTI transactions in every link of the supply chain as they change hands and move all over the world.

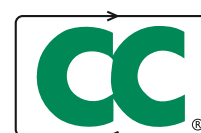

Updates throughout the day ensure full transparency

All RTI transactions are updated throughout the day, and you and your business partners can check that your RTIs are where they should be in the supply chain. This way, you can make agreements and settle disputes right away, e.g. if you have not received the quantity of RTIs that your business partner claims to have shipped.

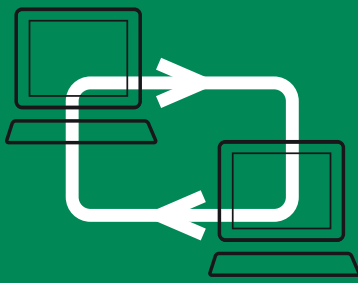

Easy to use – every computer can enter

CC LogLink is easily accessed via the Internet, so the total overview of your RTI transactions is always just a click away. A precondition for this is that all transactions are registered. It's easily done: You can either register the data manually via the Internet, you can enter the data via Excel, or you can choose to integrate CC LogLink with your company (logistic/ERP) system.

Making your products move

CC LogLink Service

We show your RTIs' every move

What you get with this service:

- 1 A complete overview of your RTI transactions***. You can track your RTIs in every link of the supply chain, as they change hands and place.
- 2 Regular updates.** All transactions are updated throughout the day.
- 3 No need to install new software.** CC LogLink is easily accessed via the Internet, so you can log-on and get an overview, wherever you are.
- 4 Security.** All data are exchanged via a neutral, secure partner, to ensure that no vital data is lost and that the only information given to CC LogLink is the one you allow us to use.
- 5 Flexible registering in CC LogLink.** Transactions must be registered in CC LogLink by you and your business partners. You can do it in one of three different ways: 1) Manually (via the Internet), 2) Via Excel, or 3) By integrating CC LogLink with your company (ERP/logistic) system.
